Question **1**

Correct

Mark 10.00 out of 10.00

Playing with Numbers:

Ram and Sita are playing with numbers by giving puzzles to each other. Now it was Ram term, so he gave Sita a positive integer 'n' and two numbers 1 and 3. He asked her to find the possible ways by which the number n can be represented using 1 and 3.Write any efficient algorithm to find the possible ways.

Example 1:

Input: *6*
Output:*6*
Explanation: *There are 6 ways to 6 represent number with 1 and 3*

1+1+1+1+1+1
3+3
1+1+1+3
1+1+3+1
1+3+1+1
3+1+1+1

Input Format

First Line contains the number n

Output Format

Print: The number of possible ways 'n' can be represented using 1 and 3

Sample Input

6

Sample Output

6

Answer: (penalty regime: 0 %)

```
#include <stdio.h>
long long find_ways(long long n)
{
    if (n < 0)
    return 0;
    long long dp[n + 1];
    dp[0] = 1;
    if (n >= 1) dp[1] = 1;
    if (n >= 2) dp[2] = 1;
    if (n >= 3) dp[3] = 2;
    for (long long i = 4; i <= n; i++)
    {
        dp[i] = dp[i - 1] + dp[i - 3];

    }
    return dp[n];
}
int main() {
    long long n;
    scanf("%lld", &n);
    long long result = find_ways(n);
    printf("%lld\n", result);
    return 0;
}

```

	Input	Expected	Got	
✔	6	6	6	✔
✔	25	8641	8641	✔
✔	100	24382819596721629	24382819596721629	✔

Passed all tests! ✔

Correct
